FIG. 2 is a block diagram of a network architecture. The network architecture includes a PSTN cloud (121) and a Wireless IP cloud (117). The PSTN cloud (121) is connected to a multi-line office phone (120) and two desktop computers (123, 125). The Wireless IP cloud (117) is connected to a multi-line office phone (116) and a mobile phone (118). A central server (112) is connected to both the PSTN cloud (121) and the Wireless IP cloud (117). A desktop computer (114) is connected to the multi-line office phone (120).
